

Benefits of a Facial

1. Nurture. Generally, we are all seeking clear, luminous, younger looking skin. Most of us follow a daily skin care routine, which doesn't have to be elaborate, but will maintain your skin's texture. Having regular spa facials will address the ever changing needs of your skin, helping it to look and feels its best.

2. Prevent Ageing We are not getting younger with each passing day. You were born with one face which will last through your lifetime so you need to take care of it. Regular facials and massages boost cell regeneration helping to promote collagen development which encourages healthier looking skin.

3. Circulation Various studies show massage improves the blood circulation in your body, the same applies to your face. Improved blood circulation in your face means that your cells get lots of oxygen and nutrients. This translates to a glowing complexion.

4. Rejuvenate Your Skin With age, skin loses its luster. Lifestyle choices, makeup, heating, cooling, pollution, coupled with little or no water intake makes it difficult for your skin to recuperate. Any of our signature Facials will help rejuvenate your skin and help improve its appearance and texture.

5. Dark Circles & Eye Bags The skin under your eyes needs extra special attention because it is much thinner than the skin on the rest of the face. Specially prepared eye creams and eye masks used during your facial will help replenish the sensitive skin around your eyes. Containing essential vitamins and minerals designed to hydrate tired skin, will also help to eliminate dark circles, reduce fine lines and wrinkles around the eye area.

6. Exfoliation The one beauty step often skipped at home, is Exfoliation. The removal of dry/dead skin cells on the surface of the skin, is one of the most important aspects of your skincare routine for your face AND body. It not only speeds up cell renewal, it helps prepare the skins surface for the skin care products that follow and helps smooth the skins surface which helps your makeup to look even and last longer. Because it increases blood circulation, regular exfoliation will help you to achieve dewy complexion.

7. Face Mask Another step usually skipped at home, is the face mask. During your facial we will prepare a mask that's specially designed for your skin type, one that will address your skins needs.

Facials are much more than just an hour of sheer bliss, they are a way of saying "I love you" to yourself and to your skin. If you want beautiful, younger looking skin over your lifetime, start taking care of it today!
